

Curriculum Vitae

Personal Information

Email	rene.gassmoeller@mailbox.org
Website	https://gassmoeller.github.io
Address	One Shields Avenue, 2119 Earth and Planetary Sciences, Davis, CA-95616, USA
Date / Place of Birth	Jan 14 th 1987, Hamm, Germany

Education

2006 - 2007	Study of Physics at Friedrich-Schiller-University Jena
2007 - 2011	Study of Geophysics at Friedrich-Schiller-University Jena, Diplom (B.Sc. & M.Sc.) in Geophysics "with distinction" Thesis: "Stress- and strain distribution at curved subduction zones"
2011 - 2015	Ph.D. at the GFZ German Research Centre for Geosciences, Section 2.5 Geodynamic Modeling Degree: Dr.rer.nat. (Ph.D.) in Geophysics Thesis: "The interaction of subducted slabs and plume generation zones in geodynamic models"

Professional Appointments

2015 - 2016	Postdoctoral Research Associate at German Research Centre for Geosciences (GFZ)
2015 - 2017	Postdoctoral Research Associate at Dept. of Mathematics, Texas A&M University
2017 - 2018	Postdoctoral Fellow at Dept. of Mathematics, Colorado State University
2018 - 2020	Assistant Project Scientist at the Dept. of Earth and Planetary Sciences (Computational Infrastructure for Geodynamics), University of California, Davis
2019 - 2020	Courtesy Appointment as Assistant Professor, Department of Geological Sciences, University of Florida
2020 -	Visiting Assistant Professor, Department of Geological Sciences, University of Florida

Peer Reviewed Publications

2011	van Hinsbergen et al. (2011): Acceleration and deceleration of India-Asia convergence since the Cretaceous: Roles of mantle plumes and continental collision. <i>Journal of Geophysical Research</i> . Doi: 10.1029/2010JB008051
2014	Zeumann et al. (2014): New Finite-Element Modelling of Subduction Processes in the Andes Using Realistic Geometries. <i>Proceedings of the IAG General Assembly</i> . Doi: 10.1007/978-3-642-37222-3_13

2016	Gassmöller et al. (2016): Major influence of plume-ridge interaction, lithosphere thickness variations, and global mantle flow on hotspot volcanism – The example of Tristan. <i>Geochemistry, Geophysics, Geosystems</i> . Doi: 10.1002/2015GC006177
2017	Dannberg et al.: The importance of grain size to mantle dynamics and seismological observations. <i>Geochemistry, Geophysics, Geosystems</i> . Doi: 10.1002/2017GC006944
	Bredow et al.: How plume-ridge interaction shapes the crustal thickness pattern of the Réunion hotspot track. <i>Geochemistry, Geophysics, Geosystems</i> . Doi: 10.1002/2017GC006875

2018	Gassmöller: It's just coding ... - Scientific software development in geodynamics. <i>EGU Geodynamics Blog</i> . https://blogs.egu.eu/divisions/gd/2018/10/09/its-just-coding-scientific-software-development-in-geodynamics/

Selected (Invited) Presentations

2012	4 th Colloquium of DFG priority programme SAMPLE. <i>Modelling the interaction between subducted slabs and thermo-chemical piles</i>
2013	Gordon Research Seminar: <i>Past plate motions and recent hotspot volcanism - Validating plate reconstructions by geodynamic modelling</i>
	5 th Colloquium of DFG priority programme SAMPLE. <i>Past plate motions and recent hotspot volcanism - Validating plate reconstructions by geodynamic modelling</i>
	AGU Fall Meeting: <i>Sensitivity of spatial distribution and dynamics of plume generation</i>

2014	<p>Ludwig-Maximilians-University Munich, Geoscience seminar: <i>Sensitivity of spatial distribution and dynamics of plume generation</i></p> <p>6th Colloquium of DFG priority programme SAMPLE. <i>Geodynamic models and seismic observations of the South Atlantic lower mantle</i></p> <p>GeoFrankfurt: <i>Geodynamic models and seismic observations of the South Atlantic lower mantle</i></p>
2016	<p>8th Colloquium of the DFG priority programme SAMPLE. <i>Major influence of lithosphere thickness variations and global mantle flow on Tristan hotspot volcanism</i></p>
2017	<p>CU Boulder, <i>Computational Science seminar: Methods and Applications of the Finite-Element Software ASPECT in Geodynamics</i></p> <p>UT Austin, <i>Seminar: The Geodynamic Modeling Code ASPECT: Structure, Methods and Plume-Ridge Interaction</i></p> <p>Colorado State University, <i>Inverse problems seminar: Forward and inverse problems in geodynamic modeling: Part I Evolution of island chains in the South Atlantic and Indian Ocean</i></p>
2018	<p>Earth-Life Science Institute (ELSI), Tokyo, <i>ASPECT tutorial</i></p> <p>Christian-Albrechts-University Kiel, <i>Geoscience Seminar</i></p> <p>University College London, <i>Global Geophysics Seminar: Geodynamic modeling with ASPECT: Applications for magma/mantle dynamics, grain size evolution and chemical zonation in mantle plumes</i></p> <p>SIAM Parallel Processing, Tokyo, <i>Advances in Mantle Convection Modeling: Nonlinear Solvers, Multiphysics, Linking scales</i></p> <p>CIDER Summer School, UC Santa Barbara: <i>Scientific Software Development 101: Fundamentals</i></p> <p>AGU panel discussion member: <i>Community Forum: The Role of an Open-Source Software Initiative Within AGU</i></p>
2019	<p>SIAM Geosciences, Houston: <i>Accurately utilizing particle-in-cell methods for adaptively refined finite-element models</i></p> <p>University of Florida, <i>Geological Sciences Seminar: Computational geoscience between research application and software project: Lessons from studying grain-size effects on mantle flow and seismic velocities</i></p> <p>HPC Best Practices Webinar of the IDEAS-Exascale Computing Project: <i>Discovering and Addressing Social Challenges in the Evolution of Scientific Software Projects</i></p>
2020	<p>Exascale Computing Project Annual Meeting, Houston: <i>Discovering and Addressing Social Challenges in the Evolution of Scientific Software Projects</i></p>

Third-party Funding

2014	<p>North-German Supercomputing Alliance: <i>Plume-Plate interaction in 3D mantle flow – Revealing the role of internal plume dynamics on global hot spot volcanism (4.8 million CPU hours, 103,000 Euro)</i></p> <p>NSF CIDER: <i>Investigating mantle dynamics using a composite rheology with grain-size evolution, tested using seismology (3,000 \$)</i></p>
2015	<p>North-German Supercomputing Alliance: <i>Follow-up on Plume-Plate interaction in 3D mantle flow (3.2 million CPU hours, 70,460 Euro)</i></p>
2016	<p>North-German Supercomputing Alliance: <i>Follow-up on Plume-Plate interaction in 3D mantle flow (3.7 million CPU hours, 79,300 Euro)</i></p>

2019 - 2020	Better Scientific Software (BSSw) fellow of the DoE IDEAS-ECP project: <i>Social challenges in the evolution of scientific software projects. (\$34,750)</i>
2019 - 2020	<i>Responsible delegate for a community early access allocation: Frontera (#5 fastest supercomputer 2019), Texas Advanced Computing Center (TACC) (15.12 million CPU hours)</i>
2019	NSF Frontier Research in Earth Sciences (FRES): <i>Development and Application of a Framework for Integrated Geodynamic Earth Models (\$1.2m with 3 PIs at UFL; joint proposal, total \$2.8m)</i>
Teaching	
2008 - 2011	Teaching assistant in geodynamics courses at Friedrich-Schiller-University Jena
2011	Student tutorials in „Mathematics for Geoscientists“, University Potsdam
2012 - 2014	ASPECT student courses in module „Computational Geodynamics“
2014	ASPECT tutorial at GeoMod 2014 conference
2016	ASPECT tutorial at CIG Allhands Meeting, UC Davis
2018	ASPECT tutorial at ELSI EON Winter School Tokyo ASPECT tutorial at CGU/CIG annual meeting, Niagara Falls ASPECT tutorial at CIDER summer school, UC Santa Barbara “Version Control with Git” tutorial at CIDER summer school, UC Santa Barbara Organization and teaching at the Rayleigh developer meeting (5 day developer meeting including teaching in scientific software development and open-source community management)
2015 - 2019	Organization and teaching at the yearly ASPECT hackathon (10 day summer school in scientific software development and development workshop)
2019	Certification as a Software Carpentry Instructor Leader of the AGU scientific workshop: <i>Best Practices for Developing and Sustaining Your Open-Source Research Software</i>
Service	
2008 - 2009	Spokesperson of the student council at the Institute for Geosciences
2009 - 2010	Member of the student council and institute council at the Institute for Geosciences
2011	Member of the organizing team of the 12 th International Workshop on Modeling of Mantle Convection and Lithosphere Dynamics.
Since 2014	Maintainer of the ASPECT geodynamic modeling software
2017	AGU Session Chair, Session: DI14A: Deep Mantle Dynamics and Its Surface Expressions III
2019	Department of Energy Review Panelist: Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) Programs. Sub-topic: <i>Technologies for Extreme-Scale Computing</i> AGU Session Convener: DI24A Thermochemical Nature and Structure of the Transition Zone and Lower Mantle, TH25I Update and Future Directions of the Open-Source Software Initiative, NS21A A Tour of Open-Source Software Packages for the Geosciences

Reviews for

Journal of Open Source Software (JOSS),
Geochemistry, Geophysics, Geosystems,
ACM - Transactions on Mathematical Software,
Chilean National Commission for Scientific and Technological Research
(CONICYT)

Relevant Professional Experience

Project maintainer	ASPECT (https://aspect.geodynamics.org) Better Scientific Software Communities (https://gassmoeller.github.io/BSSC/)
Software contributions	CitcomS (https://geodynamics.org/cig/software/citcoms/) deal.II (https://dealii.org/) Rayleigh (https://github.com/geodynamics/Rayleigh) FDPS_SPH (https://github.com/NatsukiHosono/FDPS_SPH) and others, see https://github.com/gassmoeller
Software experience	Development tools: CMake, git, Eclipse, Sphinx, Qt, Docker, Jenkins, TravisCI Scientific software: GPlates, ArcGIS
Programming languages	C++, C, Python, Shell script, Fortran, HTML
